

Aircraft Pictures

There are many places that you can collect pictures of aircraft from. Maybe from family or relatives who have flown or worked with Aircraft or who have an Aviation Hobby. Often old aircraft picture books are available from your local library, and of course magazines, newspapers, postcards etc. Try and collect six different types of aircraft and explain to your Cub Scout friends something special about those aircraft.

In case you have any difficulty – here are six pictures of aircraft below, but it needs for you to find out what is special about them. When you have found out – ask if your Cub Scout Friends know the answers !
